

West Lauderdale Water Authority

3353 County Road 200
Florence, AL 35633
(256) 766-8787

February 2, 2026

The West Lauderdale Water Authority is issuing a system wide moratorium beginning February 5, 2026 on new water connections. This means we will not be allowing any additional connections. We are not able to adequately supply any additional houses on the current system.

We are working on upgrading the system to be able to handle more connections. It will take some time to get this done. Plans for short term relief to current customers have been developed and we are working with government officials to fund new larger water lines to increase our water capacity. We are also trying to add an additional water tank. Our system was built for approximately 3,000 homes and it serves close to 6,000 now.

We will notify the public when we have increased our capacity and can accept new connections. Thank you for your patience.

Sincerely,

Andrew Massey

Secretary
