

# West Lauderdale Water Authority

---

3353 County Road 200  
Florence, AL 35633  
(256) 766-8787

June 5, 2025

The West Lauderdale Water Authority is issuing a moratorium beginning August 1, 2025 on new water connections on Highway 20 West of the Natchez Trace Pkwy and the following county roads: 40, 126, 1, 79, 8 West of the Trace, 83, 100, 60, 74, 158, 13, 143, 183, 152, 85, 10 West of the Trace, 148, 178, 116, 145, 196, 5 West of the Trace, 176, 87, 129, 132, 121, 120, 193, 191, and County road 13 in Tennessee. This means we will not be allowing any additional connections on these roads. We are not able to adequately supply any additional houses on the current system.

Subdivisions will need to be pre-approved on an individual case basis after August 1, 2025 due to the same limited water availability. Plans need to be submitted to the Water Authority in order to check if our system can handle the water supply.

We are working on upgrading the system to be able to handle more connections. It will take some time to get this done. Our system was built for approximately 3,000 homes and it serves close to 6,000 now.

We will notify the public when we have increased our capacity and can accept new connections. Thank you for your patience.

Sincerely,

Andrew Massey

Secretary
